

Questions for newly diagnosed Small Cell Lung Cancer (SCLC) patients to ask their doctor

1. Which type of lung cancer do I have?

2. Did I have a comprehensive biomarker test – which biomarkers did you check for? If not, can you order it?

3. What are my treatment options?

4. Do I qualify for a clinical trial testing a new treatment for SCLC?

5. Is immunotherapy an option for me?

6. What are possible side effects of these treatments?

7. Do I have any other biomarkers that may change my treatment options?
